

# Psychology Bridging Work – Task 3 – What Will I Study?

**Psychology – The science of the mind and behaviour**

If Psychology still looks like something you want to study after tasks 1 and 2, you should complete task 3. This task is designed to give you a better understanding of the topics in the year 1 part of the Psychology A-level. As part of your bridging work it is crucial that you look at the specification for the course. As you do make some notes in the boxes below on the content you will be studying. Each box has two sections – put the parts you think will be interesting in one side, and the bits you think you will find tricky in the other. Below is a link to the specification – **make sure you look at the A-level section!**
